

NethServer 6 - Bug #2856

certificate-update event should restart httpd

09/05/2014 09:43 AM - Filippo Carletti

Status: CLOSED	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category: nethserver-httpd	
Target version: v6.5	
Security class:	Resolution:
Affected version: v6.5-final	NEEDINFO: No
Description	
<p>apache requires a restart when certificates are changed, a graceful is not enough.</p> <p>Steps to reproduce:</p> <p>follow instructions to change certificate (http://docs.nethserver.org/projects/nethserver-devel/en/latest/certificate_management.html#install-a-custom-certificate)</p> <p>connect to nethserver using https, the old cert is offered</p> <p>connect to port 980, new cert is server</p> <p>Here's why:</p> <pre>/etc/e-smith/events/certificate-update/services2adjust/httpd-admin -> reload /etc/e-smith/events/certificate-update/services2adjust/httpd -> graceful</pre> <p>Doing a service httpd reload and accessing the server, shows the new certificate.</p>

Package in nethserver-testing:

- nethserver-httpd-2.3.1-2.0git6fcd4611.ns6.noarch.rpm

Test case

- Install the new package
- Request a https page (https://<server>)
- Change the certificate

db configuration setprop pki CommonName custom.cn
signal-event certificate-update

- Request the same https page, the certificate must have the new common name
