

NethServer 6 - Bug #3153

Missing /etc/sysconfig/clock

05/10/2015 04:22 AM - Franco Carinato

Status: CLOSED	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category:	
Target version: ~FUTURE	
Security class:	Resolution: WONTFIX
Affected version:	NEEDINFO: No
Description	
<p>in /etc/e-smith/events/actions/nethserver-base-initialize-db line 89 I read: source_bash('/etc/sysconfig/clock', \%config); but in centos 6.2 and later this file do not exist.. right ?</p> <p>Again in this script: \$config{'zone'} where is defined ?</p>	

History

#1 - 05/21/2015 06:57 AM - Filippo Carletti

I checked a CentOS 6.6 I have on Digital Ocean and the file '/etc/sysconfig/clock' is there.
On a CentOS 7 I installed from cd the file is missing.

Have you installed your CentOS 6 from cd? Or is it a vps or something similar?

#2 - 06/09/2015 10:06 AM - Franco Carinato

I've installed Centos 6.6 from proxmox templates (VM)

#3 - 06/10/2015 03:21 AM - Giacomo Sanchietti

- Target version set to ~FUTURE

I found tihs:

<http://kb.odin.com/en/123371>

It seems that virtuozzo has a bug where clock is not present in the container and should be copied from the host.
Maybe proxmox has a similar problem.

#5 - 06/12/2015 10:30 AM - Franco Carinato

I found this: clock (no clock setting is required/allowed in container) in https://openvz.org/Physical_to_container

I can't copy clock from the host (proxmox) is a debian based distribution..

Is possible to workaround the problem in nethserver installation ? Test if exists /etc/sysconfig/clock and bypass the problem ?

#6 - 06/15/2015 12:04 PM - Davide Principi

- Status changed from *NEW* to *CLOSED*

- % Done changed from 0 to 100

- Resolution set to *WONTFIX*

WONTFIX

- This problem arise only on specific VPS installations.
- The workaround could be ignore the error and set the timezone again from "Date and Time" page
- It has been [fixed on 7](#) (where /etc/sysconfig/clock does not exist).

Feel free to open again this bug if new informations are available.
