<b>Description</b>			
Problem: extra blank page printed with the "Automatically print received faxes" enabled.			
Proposed Solution: in some cases removing the -H parameter from "/var/spool/hylafax/etc/dispatch/90print" resolve the problem.			
The script "/var/spool/hylafax/etc/dispatch/90print" is not a template and the parameter, according to tiff2pdf manual force the height of the printed page: "-H Specify the maximum height of image (in inches). Images with larger sizes will be split in several pages. Option -L may be used for specifying size of split images overlapping."			
The default value is 11.90" more than the A4 format "8.27 x 11.7" ( <a href="http://en.wikipedia.org/wiki/Paper_size">http://en.wikipedia.org/wiki/Paper_size</a> ). I think that this value must be reduced a bit or just removed.			

#### History

##### #1 - 06/10/2015 03:21 AM - Giacomo Sanchietti

- Target version set to ~FUTURE

##### #2 - 08/26/2016 08:51 AM - Giacomo Sanchietti

- Status changed from NEW to CLOSED

- % Done changed from 0 to 100

- Resolution set to REJECTED
