

NethServer 6 - Bug #3277

Roaming profile doesn't work with W8,W8.1,W10

09/30/2015 12:11 PM - dz0 Ote

Status: CLOSED	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category: nethserver-samba	
Target version: v6.7	
Security class:	Resolution:
Affected version: v6.6	NEEDINFO: No
Description	
it's not possible to have roaming profile with W8,W8.1,W10	
proposed solution is creating the empty .Vn folders	
Details here: http://community.nethserver.org/t/nethserver-as-domain-controller/1704/2 http://community.nethserver.org/t/workbench-to-learn-the-development-process/1714

#3 - 10/23/2015 10:01 AM - Stefano Fancello

- Status changed from ON_DEV to MODIFIED
- % Done changed from 30 to 60

Test case:

- install nethserver-samba **from updates**
- create some users
- update nethserver-samba from testing
- check that in /var/lib/nethserver/profile/ users have also \$user.V[3-5] directories
- add a new user and check that \$newuser.V[3-5] directories are created
- delete a user and check that his directories are deleted

- check that roaming with various windows versions (≥ 8) works

We could also look at configuring ACLs so that Windows can generate its own profile directories. I feel this would be the best solution as it means we wouldn't need to store any unused profile directories and we wouldn't even have to generate any.

#7 - 11/11/2015 11:40 AM - Stefano Fancello

Hi Jacob, two question: can we allow write permission to the previous directory to let windows write profiles without let it knowing the content of other users directories? Do windows create his own profile directory if it has write access? If you are able to set up a testing environment maybe you can try by changing ACL's manually.

#8 - 11/18/2015 11:56 AM - dz0 Ote

- NEEDINFO changed from No to Yes

i've tested the current patch, and it works. can i post the report and set as verified and maybe for the suggestion of jacob we could open a new feature request, or it's better continue the test of new path here?

Just go with the verification, we can open a new issue for the enhancement.

Thanks!

System and Package Version installed

VM KVM - Clean install of Nethserver 6.7 fully updated

Package Installed: nethserver-samba-1.5.3-1.ns6.noarch

Other Package installed: DNS and DHCP server, Email, File server, MySQL server, POP3 connector , Web server

Test Original Problem

replicated bug with win10 and roaming profile

Install Updated Package

```
yum --enablerepo=nethserver-testing update nethserver-samba-1.5.3-1.1.g517c9c1.ns6.noarch
```

Test Results after update

Test case 1:

- install nethserver-samba from updates OK
- create some users OK
- update nethserver-samba from testing OK
- check that in /var/lib/nethserver/profile/ users have also \$user.V[3-5] directories OK
- add a new user and check that \$newuser.V[3-5] directories are created OK
- delete a user and check that his directories are deleted OK
- check that roaming with various windows versions (>= 8) works OK

tested with

win7

win8.1

win10

all pro edition, all VM,

all with standard win7samba.reg installed

Verified or Reopen

Verified
