

NethServer 6 - Bug #3421

Webtop: Active Directory configuration lost

09/05/2016 04:48 AM - Giacomo Sanchiotti

Status: CLOSED	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category: nethserver-webtop4	
Target version: v6.8	
Security class:	Resolution:
Affected version: v6.8	NEEDINFO: No
Description	
<p>After an upgrade of nethserver-webtop4 package, any domain related configuration is lost. For example, if the admin configures WebTop to authenticate against an Active Directory, after the update the authentication method is changed to local LDAP.</p>	
Steps to reproduce	
<ul style="list-style-type: none">- Install WebTop- Access with the admin user and open the page "Domains" -> "NethServer"- Change the "Authentication Uri" to "ldapAD" and set user name and password- Execute: signal-event nethserver-webtop4-update	
Expected behavior	
<ul style="list-style-type: none">- The configuration shouldn't be changed	
Actual behavior	
<ul style="list-style-type: none">- The authentication configuration is lost	

Associated revisions

Revision 0f844719 - 09/05/2016 09:41 AM - Davide Principi

Update domain config safely. Refs #3421

Check if the NethServer domain already exists in WebTop configuration.

Execute a SQL update or insert statement accordingly.

Revision 1a8efb2a - 09/05/2016 11:54 AM - Davide Principi

Avoid updates completely. Refs #3421

The record cannot be updated automatically to prevent overwrites of parameters specified from the configuration UI. Only on fresh installations default values are inserted.
