

NethServer 6 - Bug #3452

Backup device mounted after upgrade tool reset

03/22/2019 04:44 AM - Davide Principi

Status: CLOSED	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category: nethserver-upgrade-tool	
Target version: v6.10	
Security class:	Resolution:
Affected version: v6.10	NEEDINFO: No
Description	
Steps to reproduce	
<ul style="list-style-type: none">- Install upgrade-tool- Check the backup device is not mounted- Start the prepare step- Abort the upgrade	
Expected result	
The system must return to the original state:	
<ul style="list-style-type: none">- the backup device must not be mounted- the cron daemon is running	
Actual result	
The backup device is still mounted	
Components	
nethserver-upgrade-tool-1.1.0-1.ns6.x86_64.rpm

Associated revisions

Revision 0d688566 - 04/29/2019 08:38 AM - Davide Principi

Cleanup: unmount backup-data destinations (#3)

The post-backup-data invocation during cleanup complements the pre-backup-data one that occurs during the download action.

This is required to restore the system to a clean state, if the upgrade procedure is aborted.

See <http://dev.nethserver.org/issues/3452>
